

# HELP FIGHT LEUKEMIA

Rachel is shown here with her brother just days before the emergency room.

## RAISING HOPE FOR RACHEL

Proceeds benefit a local student recently diagnosed with Leukemia while recovering from Strep Throat and Mono, sent to the emergency room, admitted to the hospital and diagnosed with leukemia less than 48 hours later. Surprise like no other and tremendous urgency overwhelms anyone diagnosed with cancer. The ripple effect of emotions; concern, caring, love and tremendous support that surround Rachel is amazing.

Rachel's strength and determination impress so many people that there's a new found level of Hope infecting everyone. Perhaps because no matter what, Rachel has a beautiful perspective of the valuable things in life. No stranger to obstacles and adverse circumstances, her brother Kevin was born with a partial right hand, and her father was diagnosed with Multiple Sclerosis. She sees life is what you make it, and no matter what your circumstances are, it could always be worse. Give thanks in everything and you'll be happy! Nothing can hold you back. Soon to be launched on the web: [www.RAISINGRHOPE.ORG](http://www.RAISINGRHOPE.ORG)
